EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:
in the first paragraph of the specification, the phrase --, now U.S. Patent 6,328,446,-- has been added before the phrase "which is a continuation in part" on line 3 of the first paragraph.

2. The following is an examiner's statement of reasons for allowance.

Upon further consideration and in light of the applicants' arguments, the rejection over Murata et al. in view of Kawaki et al. is withdrawn. The applicants are correct in pointing out that Murata et al. is not prior art with respect to the instant application.

Furthermore, the invention as claimed is neither anticipated nor obvious over Kawaki et al. because, as argued by the applicants in the response filed 06 April 2005, Kawaki et al. do not teach or fairly suggest a functional laminate disposed on an injection molded eye lens. Because the claims now positively recite that the functional laminate is disposed on an injection molded eye lens (as opposed to merely being 'for an injection molded eye lens'), the claims are allowable over Kawaki et al. Moreover, upon reconsideration of the applicants arguments in view of the Kawaki et al. reference as a whole, the examiner concludes that there is no motivation for one

skilled in the art to combine this reference with Murata et al. because the article of Kawaki et al. is not taught as designed to be used in conjunction with an injection molded eye lens.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
